

WHO WE ARE

InquisIT LLC is a minority-owned 8(a) small business that delivers comprehensive IT services and solutions that enable federal agencies to achieve their mission-critical goals and objectives.

At InquisIT, our philosophy is simple – we succeed only when our customers succeed. InquisIT's team of skilled IT professionals is highly regarded in its ability to work side-by-side with our federal agency customers to drive solutions to today's complex challenges – no matter what those challenges may. InquisIT is led by an executive management team that averages nearly 20 years of management and IT experience, and each of our leaders brings varied and robust background and experience to the organization.

Leadership Team

InquisIT's core leadership team consists of a group of five individuals who collectively bring a range of qualifications to the table – from project and program management to administrative and deployment expertise.

Ben Keethler, President

As President and co-founder, Ben Keethler guides InquisIT's strategic direction, and ensures the company's capabilities are in line to meet the needs of its customers. Ben manages budgets and staff, maintains high accessibility to both customers and employees, hires and supports well-qualified employees and promotes fair pricing and sound ethical standards.

Ben is an industry veteran, bringing nearly 20 years of management and IT experience to InquisIT. He has served in positions ranging from operations and design engineering to personnel and program management.

Currently, Ben manages contracts not only with federal government agencies, but also with large system integrators as well.

Mike Metcalf, Senior Vice President

As Senior Vice President and co-founder, Mike Metcalf has responsibility for HR and operations, as well as special project management. Mike's top priority, however, has been and continues to be ensuring that the needs of InquisIT's customers are met on a 24/7 basis.

Mike brings 15 years of experience in the IT field to InquisIT. His experience includes wireless infrastructure, Windows server/active directory and desktop support.

Metcalf complements this technical experience with a management background that includes customer service, inventory control, documentation, and implementation of schedules and testing.

Mike's experience includes serving as director of communications for an 8a federal contractor, where he managed over 40 contracts generating in excess of \$4 million revenue.

Kevin Bell, Vice President, Operations

Kevin Bell, Vice President of Operations, manages the company's day-to-day operations. In this role, Kevin has responsibility for contract management, finance, HR, as well as project management.

A retired U.S. Marine, Kevin brings more than 40 years of experience in communication electronics, digital and voice communication systems engineering, and computer information systems.

Kevin previously served in key roles with companies such as CSC, where he was a director and program manager for multiple programs, and SAIC, where he supported the Defense Advanced Research Projects Agency.

Bob Graham, Vice President, Business Development

Bob Graham leads InquisIT's business development and marketing activities. With more than 15 years of management and IT experience, Bob has a comprehensive knowledge and understanding of networking concepts.

Bob's diverse and expansive background with multiple divisions within the Department of Justice makes him a strong team leader. He has spent the last eight years in multiple federal IT management rolls with an emphasis on managing and supporting deployment activities.

Bob's experience also includes serving as a program manager for an 8a federal contractor, where he provided program support for the Department of Justice's JCON program.

David Storey, Chief Technology Officer

David Storey is InquisIT's Chief Technology Officer. In this capacity, David is the visionary behind the solutions that InquisIT delivers to its customers.

With more than 15 years of experience in system administration, network engineering, database management and application development, David possesses the keen ability to envision how to use leading edge IT technology to drive efficiencies for InquisIT's federal customers.

David is well versed in more than eight programming languages, two SQL platforms and several directory service technologies. He has served in an engineering and development capacity for several successful IT providers dating back to 1992.
